

E-prescribing

With e-prescribing, you can electronically transmit new prescriptions and responses to renewal requests to a pharmacy without having to write the prescriptions. E-prescribing can improve members' health and financial well-being by helping them avoid preventable medication errors and optimizing their prescription drug benefits. Members experience higher satisfaction rates and health outcomes through:

- Reduced adverse drug events
- Fewer trips to the pharmacy
- Lower wait time
- Greater accuracy

The PHI contained in all prescriptions, whether written or electronic, is protected by federal and state laws, including HIPAA.
