# 1 Verify your demographic and tax ID information

Keeping your demographic and tax information up to date is important for several reasons – it can help connect you with members searching for a network health care professional, and it supports claims processing and compliance with regulatory requirements.

## Take a few minutes now to verify your demographic information:

Review your information in our **online directory** at [UHCprovider.com/findprovider](https://UHCprovider.com/findprovider). If anything needs to be updated, submit changes to [hawaii\\_network\\_management@uhc.com](mailto:hawaii_network_management@uhc.com).

In the future, you will be asked to verify and attest to your information every 120 days. You may also receive a call from us to verify your information.
