

Drive health equity through technology

Improving health equity for your patients is crucial to help ensure they have access to the resources they need for a healthy life, which includes transportation, food and housing. One of the ways you can help bridge health equity gaps is through health care technological innovations.

Complete our free CME **Driving Health Equity Through Technology and Service Innovation** course to learn about the:

- Existing health care technology innovations that can help improve health equity for underserved patients
- Changing landscape of provider coverage and reimbursements as it relates to these innovations

[Go to course](#)

Addressing these social drivers of health is key to reducing health disparities and promoting equitable health outcomes for all communities.
